sliders to pick the duration for the entire trip

Add multiple with **destinations** the control on the for **duration** each

Flexbility of chaning dates/destinations
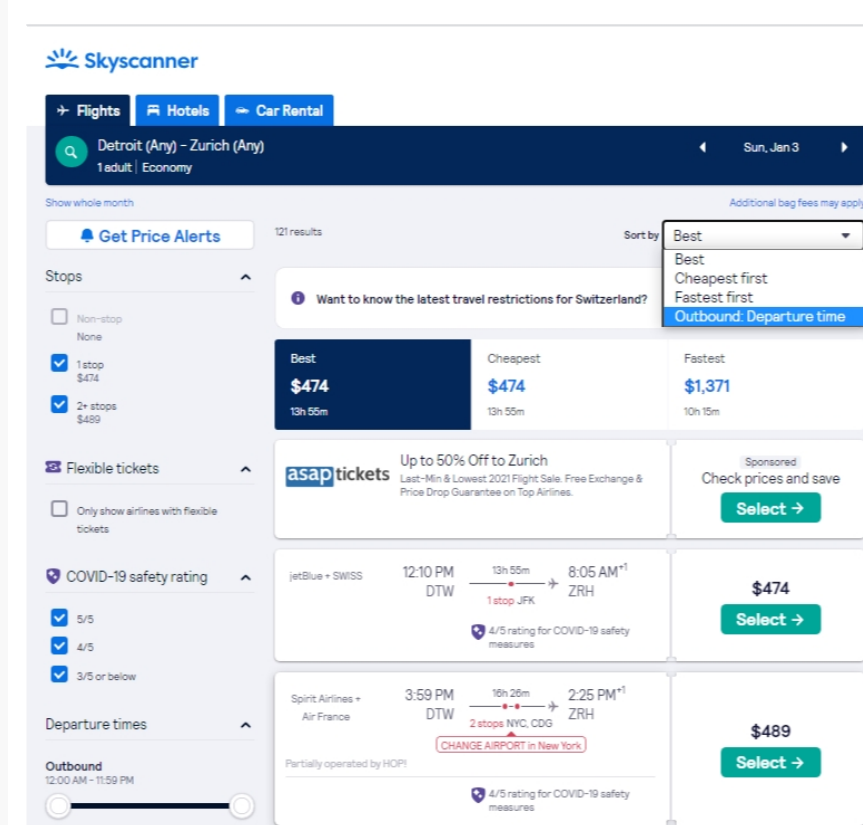

interactive map---modify order

clear way to display the multi-cities and departure/destination

Sort by options: Best/Cheapest/Fastest/Departure time; Hightlight the 'best/fastest/cheapest'

Only Flight recommended, but we can have more local transpoartation
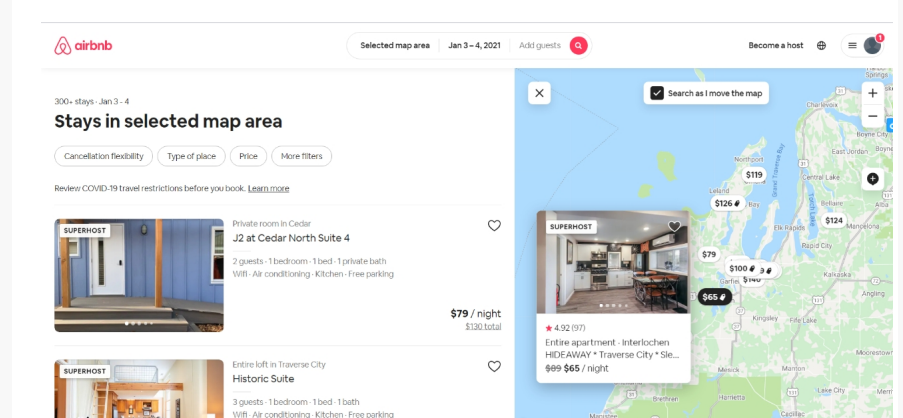

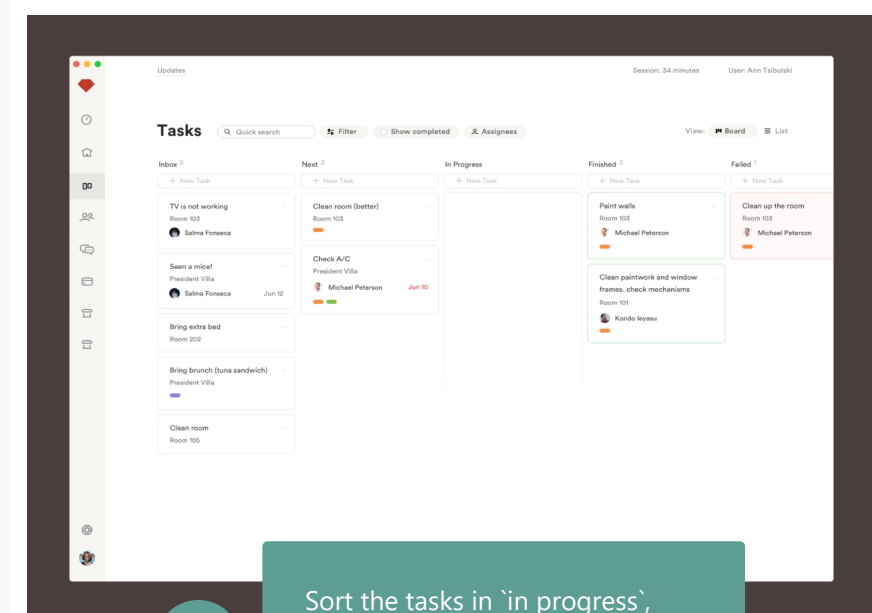

Clear Filter: Stops & Airlines (check box)
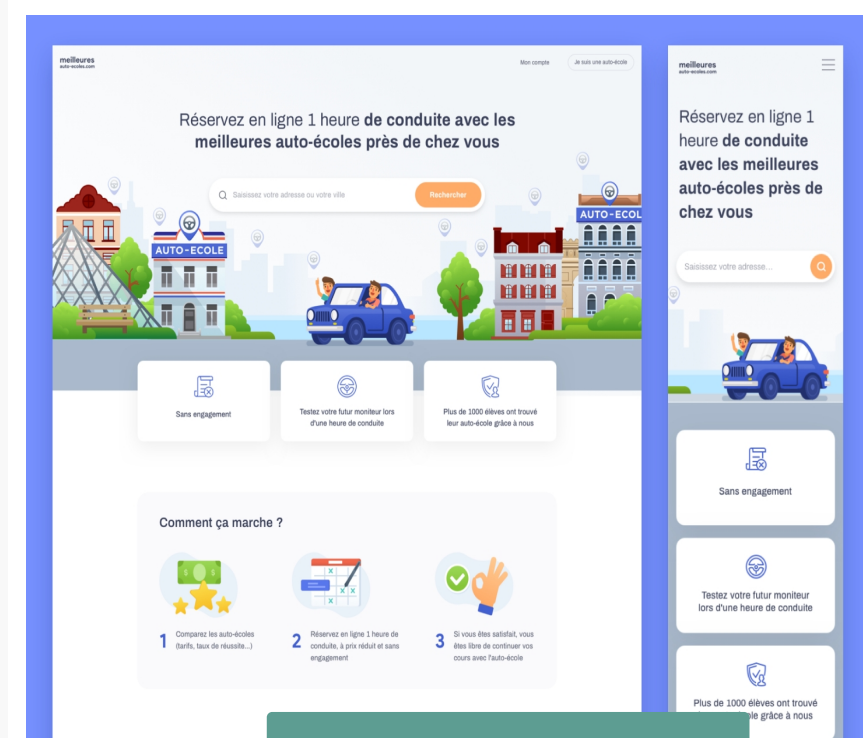

Calendar view

Clean UI design

Interactive Map with pop-up info card

Sort the tasks in `in progress`, `finished` which provides a clear clue for users to know what to do next.

landing/dashboard

The layout of main screen+sub-column has a great visual balance that allow users to focus on the main task and also get access to other related tasks.

Files are well-organized and easy to locate by using the search function

Mobile App connection for users
